From 1972 to 1991, he served as associate professor and then professor of entomology at the University of Nebraska–Lincoln's South Central Research and Extension Center, near Clay Center. His research and extension responsibilities emphasized management of field crop insects. Peters' programming efforts included management of chinch bugs and greenbugs on grain sorghum, corn rootworms, and stored grain insects.

Dr. Peters was an accomplished photographer and gardener. He taught his children the art of photography. He and his wife, Bobbie, drove to all 48 of the continental states, visited, and photographed each state capitol. They also traveled to Hawaii, visited that state's capitol, and loved every minute of it.

In addition to his wife, Bobbie, survivors include two sons: Clark Peters of Manhattan, KS, and Lindsey Peters of Lincoln, NE; one daughter, Rebecca Ryan of Wamego; and seven grandchildren.
